Do not impose any restrictions on Satellite Radio. This is suppose to be a free society and let the market decide what service they want. I implore you not to be influenced by the NAB. They must learn to compete on their own not with government influence. I chose satellite because I prefer to pay for no commercials and get traffic reports as I need it. They are acting in what appears to be an anti-trust mode and that is not healthy for our society.
Thank you for your support of Satellite Radio.
